3.6 Lab Feedback:

a) The lab content was relevant and appropriate but I felt it was too hard to catch up. I understood the concept but I am not sure how to go on with the implementation. It was very new to me and I tried my best to complete the task I am not sure how correct I may be but I have kept my efforts to complete it. The length of the Lab was good too.

b) I don't have any corrections.

My Opinion:

I felt that I am lacking with a device, there are a lot of tutorials with devices but working with a virtual device taken much more time and I felt but not sure that a lot of content and methods have been updated on the internet.
